Engineering Experiences

BYU Student Innovator Of the Year (SIOY) Competitor

- Team Leader
- Built prototype
- Physical-design, programming, and business
- Fall 2023 - present

BYU Rocketry Club GNC R&D Team

- Selected as team lead
- Developing variable ballast system
- Physics, programming, and control systems
- Participated Winter 2023 - present

Education

Brigham Young University *April '26*

Mechanical Engineering major, Computer Science minor

- Current GPA: 3.57
- Phi Eta Sigma

Western Nevada College *May '19*

Associates of Science

- Summa cum laude
- Took as dual enrollment with High School

Work Experience

Wyview Desk Attendant *MAR '23 - present*

- Trusted to manage facilities and keys

Handyman at Blue Line *OCT '18 - DEC '19 & '23/'24 Summers*

- Problem-solved to identify solutions to repair homes and yards
- Practice in spacial communicating with team members

Worker at Pita Pit *AUG '22 - APR '23*

- Prioritized work flow to maintain facilities and serve customers

Religious Volunteer *JUN '20 - AUG '22*

- Full time representative
- Spent 8 months in organizational and leadership positions
- Managed finances, social media campaign, and phone resources

Consolidator at Webstaurant *DEC '19 - MAY '20*

- Worked quickly and accurately to sort product into orders

Self-contracting Irrigator and Yard Helper *'15 - '19*

- Self-driven and proactive

Skills

- SolidWorks
- Julia
- C, C++
- Python
- Java
- Matlab
- Practice prototyping
- Competent with Spanish
- Word/Docs, Excel/Sheets, ect.

Achievements

- Eagle Scout
- BYU Engineering Safety Conference Trivia Prize Winner
- Phi Eta Sigma
- Mentored Learning in BYU FLOW Lab

Introduction

I live for the satisfaction of bringing ideas to reality. I have a special love for all things space, and have focused my education on being able to contribute to the rapidly growing area of space exploration. Studying mechanical engineering with an emphasis in aerospace is giving me an understanding of the physical systems, and my minor in computer science gives me a set of tools to model and control them. As wonderful as this earth is, the future of humanity brightens as we aim for the heavens.
